

UNM ORTHOPAEDICS

RESIDENCY

A five-year training program fully accredited by the Accreditation Council on Graduate Medical Education. We accept five residents annually through the National Resident Matching Program.

This program includes a full-compliment of children's services with treatment areas at the Main hospital and nearby at Carrie Tingley Children's Outpatient Hospital. The nearby Veteran's Administration Medical Center and Sandoval Regional Medical Center provide additional sites for resident rotations.

We accept applications for away rotations annually.

Rotations are typically from July-October. Applicants should apply through VSLO/VSAS and will be contacted regarding approval once applications are reviewed.

DIVERSITY, EQUITY, AND INCLUSION

Our population is growing more diverse, and the field of Orthopaedic Surgery needs to reflect this change. As a result, there has been an increased focus on increasing diversity in our field, which we fully support.

We recognize the value and the strength inherent in our diverse population. Thus, our mission is to advance diversity, equity, and inclusivity throughout New Mexico's Health Science institutions and the communities we serve.

FELLOWSHIPS

HAND

We pride ourselves in providing superior education and training in surgery of the hand and upper limb through a balanced curriculum that encourages personal and professional growth. We attempt to provide the broadest possible exposure to diagnosis and treatment (both operative and nonoperative) in patients of all ages.

SPORTS MEDICINE

We provide our fellows with a well-rounded surgical experience, including hip arthroscopy, complex shoulder and elbow procedures, osteotomies about the knee, pediatric and adolescent sports injuries. The fellow will be intimately involved in providing care for more than 600 Division 1 athletes at UNM's training room, plus assisting in high school/professional event coverage.

TRAUMA

We provide a well-balanced program encompassing acute and reconstructive trauma, isolated and complex cases, clinical care, didactic learning. A fellow will learn techniques and principles by guided responsibility and repetition.
